Serendipity 0.9 released

Today version 0.9 of Serendipity has been released as scheduled. Celebrating his birthday with this release is Garvin Hicking: Happy Birthday and all best wishes!

Now I will be busy updating at this weekend, and as supergarv as Serendipity proved to be in the past, I'm quite sure the update will even fix all the things I broke with the last one. :) Thanks again, Garvin, and keep up the good work!
